

Product Information

AVENO DPF Performance

0002-300009

Description

AVENO DPF Performance is a high-performance additive for reducing soot emissions in diesel vehicles with DPF. The special formulation dissolves stubborn and dense soiling on the surface of diesel particulate filters and ensures optimum engine performance. AVENO DPF Performance improves the regeneration of the diesel particulate filter in stop-and-go traffic and thus contributes to fuel savings. Selected raw materials extend the service life of the DPF filter and thus prevent expensive repairs. AVENO DPF Performance is suitable for use in all diesel engines without electronically controlled additive tank systems for filter regeneration.

Instructions for use

Add AVENO DPF Performance Cleaner regularly before refueling. Dosage: 300 ml AVENO DPF Performance Cleaner is sufficient for one application of approx 30 liters of diesel fuel, add approx every 2000 km immediately before refueling. The product is effective while driving. AVENO DPF Performance Cleaner is not suitable for vehicles with an automatically controlled additive dosing system, such as Citroen or Peugeot. Do not overdose the product (max. 2 doses per 60 liters of diesel).

Properties

- Extends the service life of the diesel particulate filter
- Can be used for all diesel fuels
- Improves the regeneration of the diesel particulate filter in stop-and-go traffic
